

# Neuro Leap

*Special Power for Special Children*

San Jose, CA

## Recommendation Letter

To Whom it May Concern,

My name is Albin Broman and I am the acting CTO of NeuroLeap Corp. NeuroLeap is an organization that enables children with disabilities to receive quality assessment and intervention. We provide apps for iPad and a novel multi-sensory IoT solution to schools and healthcare institutions.

I am honored to recommend Manu Bhat, whom I have known as a Software Engineer intern with us at NeuroLeap. For the past half year, since November 2022, he has been working remotely on our OTS 2 iPad application that makes it easier to diagnose children with special needs.

I have been very impressed by Manu's strong knowledge in iOS development. He has helped transform NeuroLeap's iOS technology stack from UI Kit to SwiftUI and demonstrated versatility in both paradigms. As a programmer, Manu has been able to implement the features we need in a timely manner. He treats coding as a discipline and makes it a point to implement best practices and take advantage of developer tools.

Manu also has a drive for initiative and commitment. In the back of his mind, he always treats the bigger picture as priority. For instance, one of the earliest tasks he performed at NeuroLeap was refactoring large files into smaller, more modular components. Since then, I have noticed him only growing as a developer and becoming more efficient. He is independent and needs only minimal instructions to deliver results. In fact, he sometimes uses his knowledge to return feedback on future design decisions.

Manu is a fluent communicator and team player during our weekly meetings. Despite being in the iOS team, he frequently collaborates with back-end engineers to assist in our REST API development. He offers his opinion and suggestions to others, but is not scared to ask for help either.

Overall, Manu is a great developer. In spite of his young age, it is evident he has a strong skill set and great potential. I would give Manu my fullest recommendation for any role related to computer science and application development.

We would be pleased to provide you with any further information regarding Manu. More information about us can be found at our website: [www.neuroleap.com](http://www.neuroleap.com)

Yours Truly,

*Albin Broman*
